

Superior Labeling, Imprinting and Die Cutting:

any size,
any shape,
any surface.

DIRECT PRODUCT IMPRINTING

Pad Printing

Our soft rubber pads conform precisely to the shape of your product, so we can apply highly-defined imprints to the surface.

Application: curved, textured or hard-to-reach surfaces, or exteriors where labeling may erode.

Screenprinting

Ultraviolet and conventional inks produce sharp results on simple, complex or multifaceted shapes.

Application: point-of-purchase displays, indoor/outdoor signage, molded plastic, front panel graphics.

Foil & Hot Stamping

We imprint with heat and pressure to create raised images, metallic or pre-printed transfers, wood grains and holograms.

Application: Plastic, paper stock and leather.

OVERLAY & LABELING

Labels

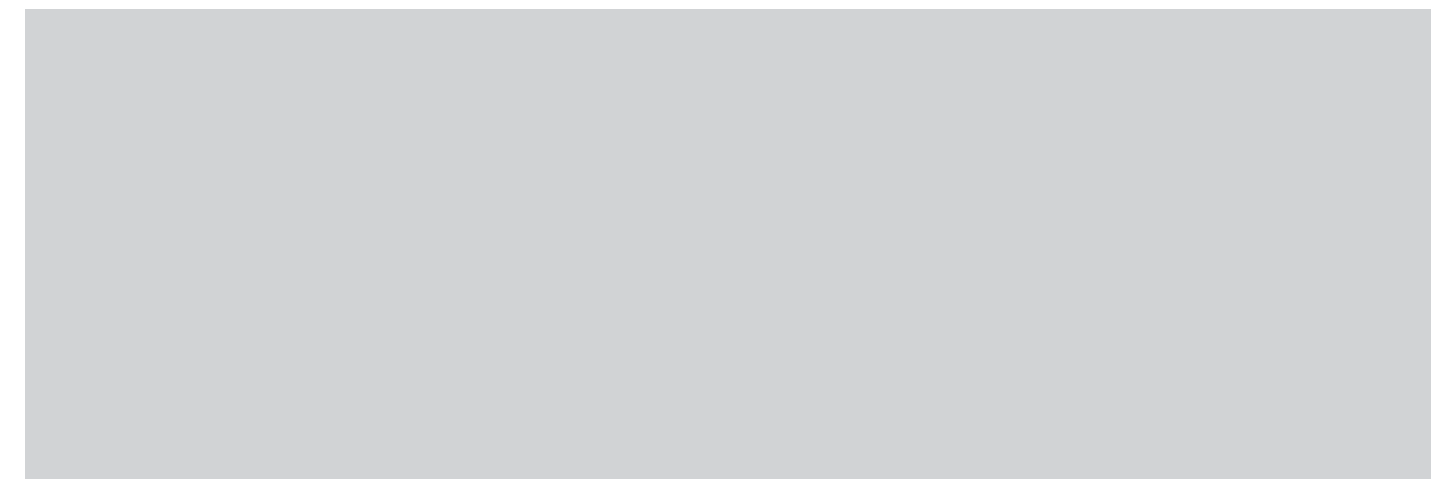

Digital and flexographic techniques produce crisp embossing, decals, stickers and labels.

Application: Logos, bar codes, regulatory labels and serial number labels.

Overlay manufacturing

Screenprinting, die-cutting, and laminating to produce your custom design or text on smooth or textured materials.

Application: Nameplates, tags and badges; graphic front panels; membrane overlays.

DIE CUTTING

Steel rule and thermal die cutting techniques punch clean, accurate perforations in polycarbonates, Teflon, Mylar, rubber, plastic, foam and other materials.

Application: Adhesives, insulators, gaskets, shielding components, and rubber, neoprene or foam surfaces

WE ALSO PROVIDE

- Complete artwork layout
- Film output services
- Spray finishing
- Engraving and paint filling
- Heat staking
- Assembly services
